- System design & architecture
- Performance optimization
- API design
- JavaScript (Node.js)
- Python
- TypeScript
- Java
- React
- Next.js
- SQL
- Search platform optimization
- Salesforce Commerce Cloud
- Cloud platform modernization
- Technical leadership
- Cross-functional coordination
- Production support
- GraphQL
- Event-driven architecture
- PostgreSQL

PROFESSIONAL SUMMARY

Senior Fullstack Engineer building and supporting scalable customer platforms across digital commerce, search, and retail launch experiences, including 7+ storefront launches. Leads **APIs, service and data integrations**, performance tuning, and event instrumentation while keeping high-traffic releases stable with **Queue-it** and bot mitigation. Partners across merchandising, analytics, and regional teams, mentors engineers, and applies **AI-assisted development** tools to speed delivery.

WORK EXPERIENCE

August 2021 - Current
Senior Fullstack Engineer, Red Van (client: New Balance), Remote

- Lead engineering on **222 of 450+ work items** for the Product Discovery team across NA, EMEA, and APAC.
- Launch the in-store associate app on Composable Storefront (PWA Kit), cutting product grid load times by **40% and optimizing APIs for the associate iPad app**.
- Protect **~$770K in annual organic revenue** by restoring event telemetry and correcting Japan canonical URLs.
- Lead the Algolia search migration across international storefronts, coordinating merchandising, analytics, and regional teams while keeping non-migrated regions live with a hybrid fallback.
- Re-architect the product data feed and build an automated batch job that replicates index settings across environments, removing payload-limit failures and manual promotion steps.
- Design a conditional caching layer that preserves edge caching while serving personalized search sorting and reducing server load.
- Integrate customer data across services with secure tokens, order-history syndication, and PII encryption for review feeds under GDPR and CCPA.

August 2020 - August 2021
Senior Salesforce Commerce Cloud Developer, Red Van, Remote

- Tracked **production incidents weekly** across Salesforce Commerce Cloud storefront releases.
- Build custom Salesforce Commerce Cloud storefront features for Claire's, Vermont Teddy Bear, Lush, and Warrior.
- Optimize storefront performance with caching, frontend tuning, and launch hardening to improve conversion and click-through rates.
- Support third-party and payment integrations, batch jobs, and data pipelines while resolving production issues quickly.

May 2018 - August 2020
Technical Lead, LiveArea, Allen, TX

- Built Salesforce LINK integration cartridges for Aurus and Bloomreach within the production checkout environment.
- Integrated PayPal and other payment providers into checkout to support reliable transaction flows.
- Mentored in-house engineers, strengthening their technical judgment and collaboration skills.

October 2015 - May 2018
Senior Software Engineer, LiveArea, Allen, TX

- Streamlined **support tickets** across e-commerce builds and integrations.
- Built e-commerce solutions for Procter & Gamble, Party City, and Movado using Java, JavaScript, TypeScript, and REST APIs.
- Integrated custom order management workflows that shortened Olay delivery times and improved fulfillment coordination.
- Collaborated with distributed and in-house teams to deliver client-facing commerce features and resolve implementation issues.

EDUCATION

May 2015
Bachelor Of Arts, Economics
University Of Texas At Austin, Austin

May 2015
Bachelor Of Science, Computer Science
University Of Texas At Austin, Austin

CERTIFICATIONS

April 2015
Salesforce Composable Storefront (B2C201)

September 2019
Salesforce Certified B2C Commerce Cloud Developer, (Active)
